

Amendments to the Claims:

The listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1. (Previously amended) System for storing and exchanging medical data representative of the health of an individual, the system comprising:

- a plurality of portable electronic storage devices, each storage device comprising an interface and one or more data carriers on which are stored medical data representative of the health of at least one individual, a first computer program and a second computer program;

- a data processing device comprising:

- a second interface for connecting the data processing device to at least one of the portable electronic storage devices,

- a processor configured so as to load from the connected portable electronic storage device either the first or the second computer program depending on the type of data processing device and executing the same, the loaded computer program including instructions that cause the processor to process the medical data stored on the portable storage device, said processing including reading, adding and modifying medical data stored on the connected portable electronic storage device;

- a display device for displaying said processed medical data;

wherein the first computer program is operable so as to exchange medical data with a data processing device of a first type en the second computer program being operable so as to exchange medical data with a data processing device of a different type.

2. (Previously amended) System as claimed in claim 1, wherein the medical data include text data and graphical data, for instance X ray plots, scans plots or electro-cardiograms.
3. (Currently amended) System as claimed in claims 1 or 2, ~~any of the preceding claims~~, wherein on the electronic storage device graphical data representative of the appearance of the individual is stored and wherein the processor is programmed so as to load the graphical data from the connected electronic storage device and to display the data representative of the appearance of the individual on the display device of the processing device so as to enable positive identification of the individual.
4. (Currently amended) System as claimed in claim 1, ~~any of the preceding claims~~, wherein the electronic storage device is configured so as to provide access code protected access to the medical data stored thereon, wherein, depending on the access code, reading, adding and/or modifying rights are conferred for predefined subsets of medical data only.
5. (Previously amended) System as claimed in claim 4, wherein one of the predefined subsets of medical data is formed by emergency medical data.
6. (Original) System as claimed in claim 1, comprising a first portable electronic storage device being configured so as to store thereon medical data in a first data format and a second portable electronic storage device being configured so as to store thereon medical data in a second data format, different from the first format.
7. (Original) System as claimed in claim 6, wherein on the first portable electronic storage device a first computer program is stored capable of having processed medical data in the first format, while on the second portable electronic storage device a second computer program is stored capable of having processed medical data in the second data format.

8. (Currently amended) System as claimed in claim 1, ~~any of the preceding claims~~, wherein access to the medical data on the electronic storage device is protected by an access code, preferably a password.
9. (Original) System as claimed in claim 8, wherein a first user or group of users has data reading rights only.
10. (Original) System as claimed in claim 8 or 9, wherein a second user or second group of users has reading and adding rights only.
11. (Currently amended) System as claimed in claim ~~8, 9 or 10~~, wherein a third user or third group of users has reading, adding and modifying rights of medical data stored or to be stored on the electronic storage device.
12. (Currently amended) System as claimed in claim 11, ~~any of claims 9-11~~, wherein the reading, adding and/or modifying rights are for a predefined subset of medical data only.
13. (Currently amended) System as claimed in claim 1, ~~any of the preceding claims~~, wherein computer program is operable so as to permit the addition of a new user or group of users only after receiving the correct access code of said individual.
14. (Currently amended) System as claimed in claim 1, ~~any of the preceding claims~~, wherein the computer program is operable so as to permit access to a predefined portion of the medical data only after receiving the correct access code of said individual.
15. (Currently amended) System as claimed in claim 1, ~~any of the preceding claims~~, wherein the processing device includes an entering device for entering data into the computer device and storing the entered data on the electronic storage device.
16. (Currently amended) System as claimed in claim 1, ~~any of the preceding claims~~, wherein the processing device is a mobile phone and the electronic

storage device is an external storage medium that can be connected to the mobile phone.

17. (Currently amended) System as claimed in claim 1, ~~any of the preceding claims~~, wherein the processing device is a mobile phone and the electronic storage device is an internal storage medium contained in the mobile phone.
18. (Currently amended) System as claimed in claim 1, ~~any of the preceding claims~~, wherein the data processing device is a personal computer.
19. (Currently amended) System as claimed in claim 1, ~~any of the preceding claims~~, wherein a portable electronic storage device is configured so as to be implanted in a person.
20. (Currently amended) System as claimed in claim 1, ~~any of the preceding claims~~, wherein the electronic storage device comprises a positioning system.
21. (Currently amended) System as claimed in claim 1, ~~any of the preceding claims~~, wherein the electronic storage device is configured so as to store non-medical personal data.
22. (Currently amended) System as claimed in claim 1, ~~any of the preceding claims~~, wherein at least part of the medical and/or health data stored on the electronic storage medium is encrypted.
23. (Currently amended) System as claimed in claim 1, ~~any of the preceding claims~~, wherein the first and second interface are wireless communication devices so as to provide a wireless connection between the portable electronic storage device and the data processing device.
24. (Currently amended) System as claimed in claim 1, ~~any of the preceding claims~~, wherein the first and second interface are wired communication devices so as to provide a wired connection between the portable electronic storage device and the data processing device.

25. (Currently amended) System as claimed in claim 1, ~~any of the preceding claims~~, wherein the computer program is operable so as to provide text on the display device in one of a plurality of languages, said one language being user selected from a pre-stored list of languages
26. (Previously amended) Portable electronic storage device for storing and exchanging medical data with a data processing device having an interface, a processor and a display device, wherein the portable electronic storage device comprises a data carrier on which is stored medical data representative of the health of at least one individual, a first and a second computer program, wherein either of the computer programs, when run on said processor, causes said processor to process the medical data stored on the data carrier, said processing including reading, adding and/or modifying medical data stored on the connected portable electronic storage device, and displaying said processed data on the display device.
27. (Canceled)
28. (Currently amended) Method of storing and exchanging medical data using in the system as claimed in claims 1, 2, 13, 14, 15, 16, 17, 18 or 25. ~~any of claims 1-25.~~
